# Hannan Seyfi

Tehran Province, Iran

(+98)921-656-7033 hannanseyfi0@gmail.com linkedin.com/in/HannanSeyfi github.com/HannanSeyfi

## Research Interests

Machine unlearning and model editing in large language models; trustworthy and controllable AI, particularly memorization, privacy, and knowledge preservation; parameter-efficient adaptation and evaluation of language models for natural language processing.

## Education

**MSc in Computer Engineering** Sep 2023–Oct 2026
Khatam University, Tehran, Iran
Specialization: Artificial Intelligence and Robotics.

- GPA: 18.13/20.
- Thesis: *Unlearning Large Language Models.*
- Supervisors: Dr. Ehsan Akhtarkavan and Dr. Babak Majidi.
- Selected coursework: Advanced Artificial Intelligence; Pattern Recognition; Cognitive Science.

**Bachelor's Degree in Computer Engineering (Software)** Sep 2018–Aug 2022
Islamic Azad University, West Tehran Branch, Tehran, Iran
GPA: 17.27/20.

Diploma in Mathematics and Physics, Allameh Helli 1 High School (NODET), Tehran, Iran (2014–2018).

## Research Experience

**Unlearning in Large Language Models** Apr 2025–Present
MSc thesis research, Khatam University Research code

- Constructed a controlled benchmark of 500 synthetic facts, with 100 forget and 400 retain facts, and 1,500 evaluation questions including held-out paraphrases.
- Trained LoRA adapters for Qwen2.5-0.5B-Instruct and evaluated gradient ascent, retain/KL regularization, PCGrad-style projection, and adaptive and rollback constraints.
- Characterized the forgetting–utility trade-off: gradient ascent reduced held-out forget accuracy from 92.5% to 34.0%, while retain accuracy fell from 91.9% to 66.9%.
- Developed reproducible GPU training and evaluation workflows using PyTorch, Hugging Face Transformers, and PEFT, with versioned data, checkpoints, and experiment reports.

**The Effect of Language on LLM Responses** May 2025–Present
Ongoing research project
Investigating the effect of language on responses generated by large language models.

**Anchoring Effects in Large Language Models** Sep 2026–Present
Working on anchoring effects in LLMs, examining how initial information in prompts influences subsequent responses.

## Technical Skills

**Programming:** Python, C++, C#, Java, Kotlin, SQL.
**Machine learning and data analysis:** PyTorch, TensorFlow, Keras, NumPy, pandas.
**LLM and research tools:** Hugging Face Transformers, PEFT/LoRA, Google Colab, Git.
**Development tools:** Unity, .NET Framework, MySQL, SQL Server, Jetpack Compose, LaTeX.

## Selected Software Projects

**VidFetch – Android Application** Sep 2026
Developed a native Android video downloader using Kotlin, Jetpack Compose, yt-dlp, and FFmpeg, with on-device processing, resolution selection, and background downloads.

**RemoteDeck – Windows Remote Control** Aug 2026
Built a Windows remote-control application using C#, ASP.NET Core, and JavaScript, enabling phones and tablets to send mouse, keyboard, text, and media commands over local Wi-Fi.
Implemented WebSocket control, device pairing and revocation, and touchpad gestures.

**Sibil – Android Mobile Game** Jun–Dec 2019
Qolenj Company, Tehran, Iran
Programmed and coordinated development of a Unity game inspired by fidget spinners. Published on Cafe Bazaar, an Android app marketplace in Iran.

## Teaching and Academic Leadership

**Computer Science Instructor** Sep 2019–Aug 2023
Allameh Helli 1 High School, Tehran, Iran
National Organization for Development of Exceptional Talents (NODET)

- Taught advanced Python programming (2020–2023), logic circuits (2019–2022), and microcontroller programming (2021–2022).
- Served as Head of the Computer Department (Sep 2021–Aug 2023).
- Supervised eighth-grade students conducting research on autonomous driving technologies (2020).

**Artificial Intelligence and Data Science Instructor** Sep 2022–Aug 2023
Allameh Helli 8 High School, Tehran, Iran
Taught artificial intelligence and data science.

**Teaching Assistant – C++ Programming** Sep 2018–Jan 2020
Islamic Azad University, Tehran, Iran
Served as a teaching assistant for three consecutive semesters.

**Geometry Instructor** Sep 2019–Jul 2020
Allameh Helli 10 High School, Tehran, Iran
Taught Geometry.

**Logic Circuits Instructor** Jul 2021–Jul 2022
Shahid Haqqani Allameh Helli High School, Bandar Abbas, Iran
Taught logic circuits.

## Industry Experience

**Backend Developer** Sep–Nov 2020
CSTCO Company, Tehran, Iran
Developed backend software using C#, the .NET Framework, and SQL Server; designed a database for libraries and bookstores.

**Game Developer and Designer** Mar 2019–Mar 2020
Qolenj Company, Tehran, Iran
Contributed to game development projects through programming, project coordination, and debugging.

## Selected Presentations

**Google's PageRank Algorithm** Nov 2025
Khatam University, Tehran, Iran.

**GPT Embeddings: Semantic Representations with GPT** May 2025
Khatam University, Tehran, Iran.

**Can LLMs Mimic Human Biases?** Apr 2025
Khatam University, Tehran, Iran.
Presented human-like mental accounting and behavioral biases in large language models.

**Word Embeddings for Summarization and Keyword Extraction** Dec 2024
Khatam University, Tehran, Iran.

**Blind Denoising Autoencoder** Nov 2024
Khatam University, Tehran, Iran.
Presented methods for recovering clean signals from noisy observations in computer vision.

## Honors and Awards

**Undergraduate Academic Ranking** Sep 2019
Islamic Azad University, West Tehran Branch
Ranked 3rd out of 200 undergraduate students in Computer Engineering.

**National Entrance Examination (Konkur)** 2018
Ranked in the top 2% in the Iranian national university entrance examination.

## Languages and English Test Score

**Persian:** Native.
**English:** Fluent; TOEFL iBT: 110/120 (Reading: 25; Listening: 30; Speaking: 27; Writing: 28).

## GRE General Test

Quantitative Reasoning: 162; Verbal Reasoning: 149; Analytical Writing: 4.0.
